

A subsidiary of one of the largest suppliers of membrane wastewater treatment systems is looking for a Junior Technical Coordinator. The scope of this full-time, non-exempt role is to provide technical support, introduce new products & conduct research.

Job duties include, but are not limited to:

- Troubleshooting at job sites including product repair work
- Supporting business partners on technical & sales activities
- Preparing written reports & data analysis for business partners
- Coordinating site visits & meetings with business partners
- Attending conferences that often involve working with business partners
- Supporting pilot tests conducted by business partners
- Researching/implementing methods for improvement to optimize MBR process/operations

In the future, this job may grow to include:

- Presenting products at conferences &/or client meetings
- Reviewing/evaluating design/drawings of new MBR projects from business partners
- Researching North American market & competitors' products

Qualification Requirements:

- Bachelor's degree in environmental engineering, civil engineering or similar field
- At least 1 year field experience of wastewater treatment process
- Valid Washington State Drivers License & good DMV record
- Ability to lift at least 50 pounds
- Travel required within North America and occasionally overseas
- Master's degree & experience in the areas described above are considered a plus
- Japanese speaking, reading, &/or writing skill is also considered a plus
- Condition of employment includes background check, DMV check & drug screen
- Must be US Citizen or Green Card holder

A competitive salary commensurate with experience is offered.
